SUMMARY

Full-Stack Web Developer with **6+ years of professional experience** building and maintaining scalable web applications, SaaS platforms, and AI-powered systems. Proven track record developing **white-label MLM systems serving 10,000+ users**, POS/inventory systems, and WordPress solutions for international clients. Specialized in **Vue.js, Node.js, PHP, and AI integrations** (OpenAI, automation). Strong communicator comfortable working with US-based clients in EST/PST time zones. Seeking a **long-term, full-time remote position** where I can contribute technical expertise and grow with a forward-thinking team.

EXPERIENCE

Freelance VA / Full-Stack Developer

ASAP Cash Offer & Cash For Houses

March 2021 - Present, United States

Lead Generation Website, and the owner does SEO work for other websites too.

- **Developed AI-powered blog writing tool** using Vue.js and Node.js integrated with OpenAI REST API, enabling one-click blog post generation and reducing content creation time by **80%**.
- **Expanded the AI tool into a white-label API service** accessible via webhooks, now serving multiple third-party clients for automated content generation.
- **Built intelligent lead processing automation** using WordPress, Zapier, and Grok AI API to perform real-time skip tracing and comparative market analysis, streamlining lead qualification.
- **Created multiple funnel-type WordPress websites** tailored to end-client specifications, driving conversions and lead generation for real estate investment business.
- **Collaborated directly with client** to enhance SEO strategies across 10+ websites, improving search rankings, organic traffic, and visibility through on-page/off-page optimization and schema markup.
- **Maintained and updated existing systems** with new features, bug fixes, and performance improvements based on evolving business needs.
- **Tech Stack:** Vue.js, Node.js, PHP, WordPress, OpenAI API, Grok AI, Zapier, MySQL, HTML/CSS/JavaScript.

Freelance Developer

EasyImpound

September 2025 - November 2025, Los Angeles, CA

- **Refactored AI-generated monolithic codebase** created in Replit into well-structured, maintainable frontend and backend repositories using modern development practices.
- **Collaborated closely with Lead Developer** to build the MVP, ensuring clean code architecture, proper separation of concerns, and scalability.
- **Delivered production-ready code** on tight timeline while maintaining code quality and documentation standards.
- **Tech Stack:** JavaScript, Node.js, Git, Modern Web Development Practices.

Mid-Full Stack Web Developer

GEER IT Solutions

December 2019 - June 2025, Taguig, Philippines

- **Developed and maintained white-label MLM system** serving **10,000+ active users** across multiple client deployments, managing complex hierarchical database structures and automated commission workflows.

- **Led small development team** in migrating MLM system codebase to new architecture, ensuring smooth transition with zero downtime and data integrity.
- **Built POS and Inventory Management Systems** for multiple retail clients, implementing real-time transaction processing, stock tracking, payment gateway integration, and comprehensive reporting.
- **Optimized compensation plan algorithms** and refactored POS system codebase, improving performance by **40%** and reducing calculation errors.
- **Converted Figma designs into responsive, pixel-perfect HTML/CSS** for multiple web applications, ensuring cross-browser compatibility and mobile responsiveness.
- **Contributed to e-commerce functionality development**, enhancing user experience, cart systems, and payment processing reliability.
- **Received Leadership Award** (December 2020) for mentoring junior developers and leading successful project deliveries.
- **Tech Stack:** PHP, Laravel, CakePHP, Angular, Vue.js, MySQL, MariaDB, JavaScript, HTML/CSS, Git.

Junior Web Developer

Digima Web Solutions

March 2018 - December 2019, Taguig City, Philippines

- **Developed Admin Panel and Member Areas** for MLM platform using Angular (frontend) and Laravel (backend), implementing role-based access control and user management.
- **Provided technical support and bug resolution**, including after-hours emergency fixes for critical production issues.
- **Collaborated with senior developers** to implement features, troubleshoot issues, and maintain code quality standards.
- **Tech Stack:** Angular, Laravel, PHP, MySQL, JavaScript, HTML/CSS.

PROJECT

Loyalty Rewards System

Internet Cafe • January 2024 - January 2024

- Built a custom Loyalty Reward System for internet café using **Electron + Node.js**, enabling point tracking, rewards redemption, and customer management.
