Jose Marie De Castro

Senior Full Stack Developer · Philippines · connect@jdecastro.dev · jdecastro.dev · in/jose-marie-d-903873268

SUMMARY

Full-stack developer with 8 years building systems where the numbers have to be right — commerce, point of sale, inventory, commissions and learning. Currently building and operating Omni, a multi-tenant commerce platform running six live client businesses from a single codebase, with an append-only financial ledger underneath. Comfortable owning a system end to end: schema and API through to deployment, backups and the client conversation. Works remotely with US and PH clients.

EXPERIENCE

Full Stack Developer (Contract)

March 2021 - Present

ASAP Cash Offer / Cash For Houses (US real estate investor)

United States (Remote)

Lead generation websites, marketing automation, and AI tooling.

- Developed AI-powered blog writing tool using Vue.js and Node.js integrated with OpenAI REST API, reducing content creation time by 80%
- Expanded the AI tool into a white-label API service accessible via webhooks, now serving multiple third-party clients
- Created multiple funnel-type WordPress websites driving conversions and lead generation for real estate investment business
- Collaborated directly with client to enhance SEO strategies across 25+ websites, improving search rankings and organic traffic

`Vue.js · Node.js · PHP · WordPress · OpenAI API · Grok AI · Zapier · MySQL`

Senior Full Stack Developer

July 2025 - Present

Omni Tech Business IT Solutions

Philippines (Remote)

A multi-tenant commerce platform running six live client businesses from one codebase.

- Designed an append-only financial ledger with per-slot wallet materialization, so every balance is reproducible from history rather than edited in place
- Built a pluggable compensation framework — nineteen payout plans behind one interface, with framework-owned locking, idempotency and earning caps
- Shipped five independently deployable modules: storefront and marketplace, cashier POS, multi-branch inventory, commissions, and a learning platform
- Delivered white-label multi-tenancy through 162 configuration flags, so a new client is a deployment and a preset rather than a fork
- Operate six single-tenant production deployments with per-client object storage and automated nightly database backups

`TypeScript · Fastify · PostgreSQL · Drizzle · Redis · BullMQ · React · Docker`

Full Stack Developer (Contract)

September 2025 - November 2025

EasyImpound

Los Angeles, CA (Remote)

- Refactored an AI-generated monolithic codebase created in Replit into well-structured, maintainable frontend and backend repositories
- Collaborated closely with the Lead Developer to build the MVP, ensuring clean architecture and proper separation of concerns
- Delivered production-ready code on a tight timeline while maintaining code quality and documentation standards

`JavaScript · Node.js · Git`

Mid-Full Stack Web Developer

December 2019 - June 2025

GEER IT Solutions Taguig, Philippines

Enterprise software development for direct-sales commerce, POS, and e-commerce platforms.

- Developed and maintained a white-label direct-sales commerce platform serving 10,000+ active users across multiple client deployments
- Led a small development team in migrating the platform codebase to a new architecture with zero downtime
- Built and operated the platform backend as a serverless Google Cloud stack: Node.js Cloud Functions with Firestore, Pub/Sub scheduled jobs, Firebase Auth, Cloud Messaging push notifications, and Firebase Hosting, across separate staging and production projects
- Built POS and Inventory Management Systems for multiple retail clients with real-time transaction processing
- Optimized compensation plan algorithms and refactored POS system, improving performance by 40%
- Built features across a multi-portal school management platform spanning K-12 and college academics
- Received Leadership Award (December 2020) for mentoring junior developers and leading successful project deliveries

`Node.js · Firebase · Google Cloud Platform · Vue.js · Quasar · Capacitor · Angular · PHP · Laravel · CakePHP · MySQL · MariaDB`

Junior Web Developer

March 2018 - December 2019

Digima Web Solutions Taguig City, Philippines

Direct-sales commerce platform development with Angular and Laravel.

- Developed Admin Panel and Member Areas for a direct-sales platform using Angular (frontend) and Laravel (backend)
- Implemented role-based access control and user management systems
- Provided technical support and bug resolution, including after-hours emergency fixes for critical production issues
- Collaborated with senior developers to implement features and maintain code quality standards

`Angular · Laravel · PHP · MySQL · JavaScript · HTML/CSS`

SELECTED PROJECTS

School System — K-12 + University

Lead developer · 2023 – present

Eight role-based React portals over one Express + Prisma API — admin, teacher, guardian PWA, RFID gate scanner, canteen POS, registrar, guidance and clinic — with two academic engines (DepEd K-12 and college) selected by institution type.

Pop Empire

E-commerce · 2026

Collectibles store with cart, checkout and admin CMS on Express + Prisma + PostgreSQL, built around manual bank-transfer verification for markets where cards are not the norm.

Loyalty Rewards System

Electron desktop · 2024

Points tracking, rewards redemption and customer management for an internet café, built with Electron and Node.js.

EDUCATION & RECOGNITION

Bachelor of Science in Information Technology
STI College Malolos · Malolos City, Bulacan

Leadership Award — December 2020
GEER IT Solutions. For mentoring junior developers and leading successful project deliveries.
